## Spring return plant valve actuators

## FA-2000

Floating and proportional control
The FA-2000 series electric actuators are available for 3-point control or with electronic positioner for $0 . . .10 \mathrm{~V}$ or $0 \ldots 20 \mathrm{~mA}$ control. It provides a fully variable valve aperture, a power failure spring return safety mechanism and an electrically operated manual override. Three models of the FA-2000 are available.
The FA-22 ("failsafe" position down = stem fully extended) and FA-25 ("failsafe" position up = stem fully retracted):
this model pair has a 25 mm stroke and a minimum of 2400 N thrust.
The FA-23 ("failsafe" position down) and FA-26 ("failsafe" position up): this model pair has a 42 mm stroke of and a minimum thrust of 2200 N . The FA-24 ("failsafe" position down) and FA-27 ("failsafe" position up): this model pair has a stroke of 13 mm and 2000 N minimum thrust. The actuator can be combined with VG8000 (H, N, V) series in accordance with the maximum close-off pressure ratings specified. The FA-2000, when delivered as a single unit, is pre-set to facilitate installation with minimum adjustment; it is also available with a variety of options such as auxiliary switches and feedback potentiometers

## Features

- Power failure mechanism (spring return)
- Visible calibration ring on stem coupling
- Positioner with adjustable starting point, span and direct/reverse action
- Electrically operated manual override
- Quick-fit coupling clamp
